Winnipeg

MANITOBA
CANADA

THE GATEWAY OF THE EAST, WEST
AND GOLDEN NORTH

WINNIPEG, MANITOBA, CANADA

The wide streets of Winnipeg are typical of this one-time outpost of the Empire—now recognized as the Gateway to both the East, the West and the Golden North.

Winnipeg is the meeting place of the Industrial East with the Agricultural West and its commerce is consequently of a diversified character.

In 1870 Winnipeg had a population of 215; to-day Greater Winnipeg is the home of 280,000 people.

Take a look at a map of North America—you will find Winnipeg right in the centre, seventy miles north of the International Boundary.

Winnipeg has been and will continue to be the centre around which the development of Western Canada goes on. One hundred years ago the Hudson's Bay Company erected forts in the Winnipeg district; one is still standing. Fifty years ago the Wolseley Military Expedition arrived here from Eastern Canada to restore law and order after the Riel Rebellion. Ten years ago 60,000 Manitoba citizens left Winnipeg to fight the battles of the Empire overseas.

Winnipeg is a city of beautiful parks and tree-shaded avenues. Over 700 acres of parks and many miles of boulevards make Winnipeg a city beautiful.

Schools and colleges are the outward sign of a prosperous, progressive community. Winnipeg has more university students per capita than any other Province or State in America—66 schools, 1,000 teachers and 6 colleges.

Winnipeg has 50,000 homes—real homes—well kept and pleasing to the eye. Winnipeg gardens are a revelation to our visitor.

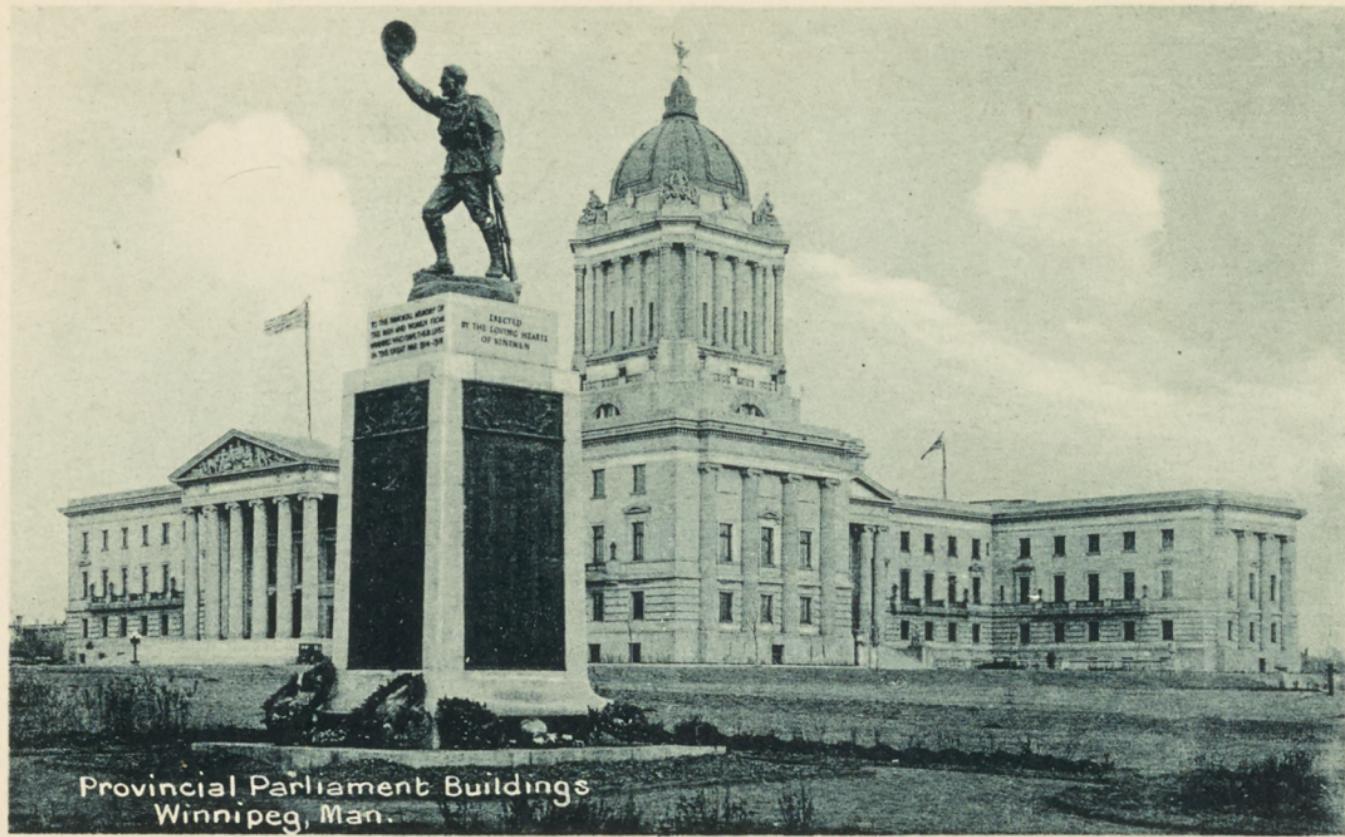

What has made Winnipeg the third largest city in Canada? The answer is plain. Its geographic and strategic location; the fact that it is the gateway to the Prairie Provinces, which contain the greatest unbroken stretch of wheat producing land in the world; the wealth of the territory surrounding it.

Winnipeg is an industrial city, great now and growing greater. It has 1,000 factories, 30,000 employees and an industrial output of \$150,000,000.00 per annum. New industries are springing up. A tremendous \$5,000,000.00 pulp and paper mill is now in course of erection. Development of mineral resources, including gold, silver, lithia and copper is being carried on by United States, British and Canadian capital within 100 miles of Winnipeg.

Winnipeg has much to offer the pleasure-seekers—good roads, good fishing and hunting, beautiful scenery among lakes, rivers and heavily wooded country, all within 100 miles. Fifty miles over perfect roads or by train transports you to lake-side beaches, second to none in the West. Splendid hotels, well conducted, horse racing, athletics of all kinds, with cosy theatres for the evening, all add to the pleasure of those visiting Winnipeg.

Then there are those brightly illuminated streets—they tell a story, the story of tremendous hydro-electric power on the rivers in the Greater Winnipeg area, power that is developed and sold at a price lower than in any other city on the American continent.

Winnipeg! the City where East and West, commerce and agriculture, business and pleasure join hands to make Canada's midway City a place of interest and activity.
